Student ID: 21011088

KNOWN TECHNOLOGIES: C | Python | HTML & CSS | Git & Github | Unix | SSH | AWS

PROJECTS

BeTreel - 1st Place, The Golden Hack
Wilfrid Laurier University (Sept 2022)
Project: BeTreel (Devpost)
- Created a proof-of-concept for a social media platform that promoted sustainability.
- Worked in a team to develop a product that met the objectives laid out by the hackathon organizers.

ForAllTimes
Study space person counter
Github repository
- Set up a Raspberry Pi as an AWS IoT device to send entry/exit data from ultrasonic sensors to a Lambda function.
- Implemented an AWS Lambda function to receive data from the Raspberry Pi and update a database.
- Used a DynamoDB to store count data, which our backend used to display the current count on our website.

Hangman game
Github repository
- Implemented object-oriented programming techniques to clean up code and increase maintainability.
- Improved UX by decreasing graphics lag using multi-threading.
- Built an encryption algorithm to hide phrases from user, which required reading and writing to files.

EDUCATION

University of Waterloo
(Sept 2022 - present)
Software Engineering, Honours (BSE)
- Sem 1: 89.5% (3.8/4.0)

Lawrence Park C.I., Toronto
(Sept 2018 - June 2022)
Hon. Certificate of Bilingual Studies, French Immersion
- Grade 12: 99.2%

AWARDS

President's Scholarship of Distinction
University of Waterloo (Sept 2022)
